

Computer 1 Associates, Inc.

SECURITY SYSTEMS

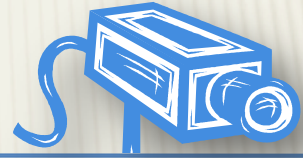

Overview

- In a world where theft and burglary are commonplace, it is important to stay protected. With a security system from Computer 1 Associates, you get state of the art surveillance and knowledgeable customer service support, giving you peace of mind even when you are away from your business or home.
- Today's security systems utilize the latest in video, storage, and surveillance technologies to provide users with an effective and reliable security solution.
- Most security systems now offer online/mobile monitoring capabilities at no extra cost, allowing you to keep an eye on your investment even when you are away.
- The majority of security systems come in pre-bundled packages, which takes the guesswork out of pairing cameras, recorders, and monitors. This allows us to get your system up and running in as little time as possible and makes for an easy security solution. Custom systems are also available for added flexibility.

Choosing Your System

- With such a wide range of surveillance systems available today, it can be difficult to find the right fit for your needs. The following guide from SVAT Security will help you select from the key features/options found on most of today's systems and serves as a good starting point for those looking to invest in a surveillance system (guide is in pdf format):

[SVAT Easy Guide to Surveillance Systems](#)

- Along with SVAT's guide to surveillance, Computer 1 is also a valuable resource when it comes to selecting the right security system. On the next page, you will find a listing of some of the security systems we offer through our partnership with SVAT Security and as always, please don't hesitate to email or call us with any questions you might have:
